

C.L-CNC-400G

高光机

功能

此机拥有五组轴向，二个工作站，一个三轴工作站，一个四轴工作站，可以精雕、花式加刀，加工铝架、注塑架等等。二个直排式主轴，一个高光60000转主轴，加工产品达镜面效果。弹头底座、精雕夹具可自由切换，快速换型，调机方便。应变生产中的多样化精雕加刀。

优点

- 应变产口多样化需求
- 配高速主轴60000转
- 高光低一级
- 滚桶后的高光加刀

High finish machine

Functions

This machine has five axial, two workstations, one three-axis workstation, and one four-axis workstation, which can be used for precision carving, fancy cutting, processing of aluminum frames, injection molding frames, and so on. Two vertical spindles and one high gloss 60000 rpm spindle, achieving a mirror like effect when processing products. The adaptor can be freely switched, quickly changed, and adjusted conveniently. Diversified carving and cutting in production.

Advantages

- Adapt to diversified production needs.
- Equip high-speed spindle with 60000 rpm.
- High gloss finish after barrel and no more polishing.
- Accompanied with product images.
